No part of this publication may be reproduced or transmitted in any form or by any means, electronic or mechanical, including photocopy, recording, or any information storage and retrieval system, without permission in writing from the copyright owner.

The appearance of the code at the bottom of the first page of an article in this journal indicates the copyright owner's consent that copies of the article may be made for personal or internal use, or for the personal or internal use of specific clients. This consent is given on the condition, however, that the copier pay the stated per copy fee through the Copyright Clearance Center, Inc. (222 Rosewood Drive, Danvers, Massachusetts 01923), for copying beyond that permitted by Sections 107 or 108 of the U.S. Copyright Law. This consent does not extend to other kinds of copying, such as copying for general distribution, for advertising or promotional purposes, for creating new collective works, or for resale. Copy fees for pre-1994 articles are as shown on the article title pages; if no fee code appears on the title page, the copy fee is the same as for current articles.

Contents of Volume 66

NUMBER 1, JULY 1994

EPIDEMIOLOGY STUDIES

SHANNON K. HEATH, JANE Q. KOENIG, MICHAEL S. MORGAN, HARVEY CHECKOWAY, QUENTIN S. HANLEY, AND VIVIANA REBOLLEDO. Effects of Sulfur Dioxide Exposure on African-American and Caucasian Asthmatics. 1

DAVID BELLINGER, ALAN LEVITON, ELIZABETH ALLRED, AND MICHAEL RABINOWITZ. Pre- and Postnatal Lead Exposure and Behavior Problems in School-Aged Children 12

GERALD B. HAYES, TING-TING YE, PEI-LIAN LU, HE-LIAN DAI, AND DAVID C. CHRISTIANI. Respiratory Disease in Cotton Textile Workers: Epidemiologic Assessment of Small Airway Function 31

TOXICOLOGY STUDIES

J. P. BUCHET, J. PAUWELS, AND R. LAUWERYS. Assessment of Exposure to Inorganic Arsenic Following Ingestion of Marine Organisms by Volunteers 44

D. B. SAGER AND D. M. GIRARD. Long-Term Effects on Reproductive Parameters in Female Rats after Translactational Exposure to PCBs 52

SHEANA WHELAN FUNKHOUSER, OTONIEL MARTINEZ-MAZA, AND DONNA L. VREDEVOE. Cadmium Inhibits IL-6 Production and IL-6 mRNA Expression in a Human Monocytic Cell Line, THP-1 77

ENVIRONMENTAL TOXICOLOGY STUDY

M. LEMOS, A. J. F. C. LICHTENFELS, E. AMARO, JR., M. MACCHIONE, M. A. MARTINS, M. KING, G. M. BÖHM, AND P. H. N. SALDIVA. Quantitative Pathology of Nasal Passages in Rats Exposed to Urban Levels of Air Pollution 87

BIOLOGICAL MARKERS

ALFRED M. BERNARD, HARRY A. ROELS, JEAN-PIERRE BUCHET, AND ROBERT R. LAUWERYS. Serum Clara Cell Protein: An Indicator of Bronchial Cell Dysfunction Caused by Tobacco Smoking . . 96

RISK BENEFIT STUDY

JOEL SCHWARTZ. Societal Benefits of Reducing Lead Exposure 105

NUMBER 2, AUGUST 1994

HUMAN STUDY

BONNIE R. STERN, MARK E. RAIZENNE, RICHARD T. BURNETT, LINDA JONES, JILL KEARNEY, AND CLAIRE A. FRANKLIN. Air

Pollution and Childhood Respiratory Health: Exposure to Sulfate and Ozone in 10 Canadian Rural Communities 125

EPIDEMIOLOGY STUDIES

KATHLEEN SCHERER, ALLEN KRAUT, ANNALEE YASSI, ANDRE WAJDA, AND JUDITH BEBCHUK. Using Administrative Health Data to Monitor Potential Adverse Health Effects in Environmental Studies 143

OLLI MARTTILA, JOUNI J. K. JAAKKOLA, VESA VILKKA, PAAVO JÄPPINEN, AND TARI HAAHTELA. The South Karelia Air Pollution Study: The Effects of Malodorous Sulfur Compounds from Pulp Mills on Respiratory and Other Symptoms in Children 152

DIANE K. WAGENER, TAMARA HARRIS, AND JENNIFER H. MADANS. Proteinuria as a Biomarker: Risk of Subsequent Morbidity and Mortality 160

TOXICOLOGY STUDIES

EMIL FRANTÍK, MIROSLAVA HORNYCHOVÁ, AND MILAN HORVÁTH. Relative Acute Neurotoxicity of Solvents: Isoeffective Air Concentrations of 48 Compounds Evaluated in Rats and Mice 173

JESSE P. JOAD, RUTH J. MCDONALD, SHRI N. GIRI, AND JOHN M. BRIC. Ozone Effects on Mechanics and Arachidonic Acid Metabolite Concentrations in Isolated Rat Lungs. 186

KIRSI LUOTO, MIKKO HOLOPAINEN, AND KAI SAVOLAINEN. Scanning Electron Microscopic Study on the Changes in the Cell Surface Morphology of Rat Alveolar Macrophages after Their Exposure to Man-Made Vitreous Fibers 198

TATSURO ISHIZAKI, EIJI YANO, NAOKO URANO, AND PETER H. EVANS. Crocidolite-Induced Reactive Oxygen Metabolites Generation from Human Polymorphonuclear Leukocytes 208

EXPOSURE STUDY

MARK R. FARFEL, J. JULIAN CHISOLM, JR., AND CHARLES A. ROHDE. The Longer-Term Effectiveness of Residential Lead Paint Abatement 217

EXPERIMENTAL STUDY

TATIANA B. SUSLOVA, ZINAIDA P. CHEREMISINA, AND LUDMILA G. KORKINA. Free Radical Generation during Interaction of Chrysotile Asbestos with Natural Compounds 222

BIOLOGICAL MARKER

J. M. KEMMEREN, G. VAN POPPEL, P. VERHOEF, AND M. J. JARVIS. Plasma Cotinine: Stability in Smokers and Validation of Self-Reported Smoke Exposure in Nonsmokers 235

AUTHOR INDEX FOR VOLUME 66 244

NOTICE

The Subject Index for Volume 66 will appear in the November 1994 issue as part of a cumulative index for the year 1994.

INSTRUCTIONS TO AUTHORS

Manuscripts. Environmental Research publishes original reports describing studies of the toxic effects of environmental agents and conditions in humans and animals, including both experimental subjects and ecosystems. The principal aims of the journal are to increase understanding of the etiology of preventable disease and environmental impairments, and to increase understanding of the mechanisms by which environmental agents cause disease and ecological effects.

The study of environmental health is inherently multidisciplinary. Therefore, the journal welcomes relevant articles in:

- epidemiology and risk analysis
- toxicology
- environmental and occupational medicine
- the neurosciences
- pathology
- pharmacology
- reproductive biology
- biochemistry
- molecular and cellular biology
- mineralogy

Reports which bridge one or more of these disciplines will be particularly encouraged, as will studies employing biological markers of toxic exposure and effect.

Environmental Research will publish full-length articles (usually 10–20 printed pages) and short communications. Short communications, which will be published on an expedited schedule after rapid review, should be no longer than six typewritten pages and contain no more than two figures or tables. Occasional critical reviews and selected book reviews may be invited and, after review, published.

Submission of Manuscripts. All manuscripts should be submitted to:

Environmental Research
Editorial Office
525 B Street, Suite 1900
San Diego, California 92101-4495
Telephone: (619) 699-6469
Fax: (619) 699-6859

Manuscripts should be submitted in *quadruplicate* (one original and three photocopies), including four sets of figures. All copies of halftone photographs *must* be glossy prints or originals; photocopies of halftones do not show sufficient detail to be used for the review process.

Manuscripts are accepted for review with the understanding that the same work has not been published, that it is not under consideration for publication elsewhere, and that its submission for publication has been approved by all of the authors and by the institution where the work was carried out; further, that any person cited as a source of personal communications has approved such citation. Written authorization may be required at the Editor's discretion. Articles and any other material published in *Environmental Research* represent the opinions of the author(s) and should not be construed to reflect the opinions of the Editor(s) and the Publisher.

Authors submitting a manuscript do so on the understanding that if it is accepted for publication, copyright in the article, including the right to reproduce the article in all forms and media, shall be assigned exclusively to the Publisher. The Publisher will not refuse any reasonable request by the author for permission to reproduce any of his or her contributions to the journal.

All papers will be published in English.

Form of Manuscript. Manuscripts should be typewritten (not mimeographed) with double or triple spacing and wide margins on high-quality bond paper. Subdivision of the article into *Abstract* (50–200 words), *Introduction, Materials and Methods, Results, Discussion, Conclusions, Acknowledgments, and References* is recommended. In addition, section headings are often useful. Number all pages consecutively beginning with the title page.

Page 1 should contain the article title, the names and affiliations of all authors, an abbreviated form of the title (not to exceed 50 characters including letters and spaces) and the name, telephone, fax, and e-mail numbers, and complete mailing address of the person to whom all correspondence should be

sent. *Page 2* should contain an abstract and five descriptive key words. On *page 3* provide information on funding sources supporting the work described in the manuscript, and formal assurance that any studies involving humans or experimental animals were conducted in accordance with national and institutional guidelines for the protection of human subjects and animal welfare. No manuscript will be considered unless this information is supplied.

Abbreviations. Follow the usage established by *Chemical Abstracts*. If others are utilized define on first use.

Figures. Number all figures consecutively with Arabic numerals; legends should be typed together on a separate sheet. Lettering on the original figures should be large enough to take a reduction of 50–60 percent. Graphs should be plotted with black India ink on light blue coordinate paper, no larger than 8½ × 11 in. Grid lines that are to show in the photoreproduction should be inked in black. Photographs should be glossy prints (5 × 7 or 8 × 10 in.) with strong contrasts. X-rays should be right-reading glossy prints. Providing an overlay that indicates the most critical areas of halftones will aid in ensuring high-quality reproduction. Illustrations in color can be accepted only if the authors defray the cost.

Tables. Number all tables in order of appearance with Arabic numerals; type each table double-spaced on a separate page, including a short descriptive title typed double-spaced above the table. Footnotes to tables indicated by superscript lowercase *italic* letters, should be typed double-spaced at the end of the table. Keep in mind the dimensions of the journal when planning the number of columns in a table.

Footnotes. Text footnotes should be avoided whenever possible.

References. These are to be cited in the text by the author's name and year of publication. References should be listed alphabetically in an unnumbered list at the end of the paper in the following style:

Coleman, D. C., Reid, C. P. P., and Cole, C. V. (1983). Biological strategies of nutrient cycling in soil systems. *In* "Advances in Ecological Research" (A. MacFayden and E. D. Ford, Eds.), Vol. 13, pp. 1–55. Academic Press, New York/London.

Rice, E. L. (1984). "Allelopathy," 2nd ed. Academic Press, New York.

Takács, S., and Tatár, A. (1987). Trace elements in the environment and in human organs. I. Methods and results. *Environ. Res.* **42**, 312–320.

The names of journals should be abbreviated according to the latest available edition of *Index Medicus* or *Chemical Abstracts Service Source Index*. Include in the reference list articles that are "in press," but "manuscript in preparation," "personal communication," and "unpublished observation" are to be avoided.

Reprints. A reprint order form will accompany the proofs. The corresponding author receives 50 reprints free of charge, and additional copies may be ordered.

Correspondence. Editorial correspondence concerning the manuscript should be addressed to:

Environmental Research
Editorial Office
525 B Street, Suite 1900
San Diego, California 92101-4495

Correspondence concerning manuscripts in production and proofs should be addressed to:

Environmental Research
Production Department
Academic Press, Inc.
Journal Division
525 B Street, Suite 1900
San Diego, CA 92101-4495

Correspondence and information concerning subscriptions should be addressed to:

Academic Press, Inc.
Journal Subscription Department
6277 Sea Harbor Drive
Orlando, FL 32887-4900

Personal Computer Disks. Manuscripts may be submitted to *Environmental Research* on personal computer disks after the manuscript has been accepted and after all revisions have been incorporated onto the disk. Label the disk with the type of computer used, the type of software and the version number, and the disk format. All tabular material will be typeset conventionally. Art must be prepared as camera-ready copy; see the section on Figures earlier in this information for authors.

A hard copy printout of the manuscript that exactly matches the disk file must be supplied. Academic Press will not accept disks without accompanying printouts of all files on the disk. File names must clearly indicate the content of each file. The manuscript will be edited according to the style of the journal, and the proofs must be read carefully by the author. Disks that are not translatable or economical to process will not be used. The publisher reserves the right not to use the disk.

For further information on preparing disks for typesetting conversion, please contact the publisher (Editorial Supervisor, Journal Division, Academic Press, Inc., 525 B Street, Suite 1900, San Diego, California 92101-4495; telephone: (619) 699-6415; fax: (619) 699-6800).
